

PRINTING INDUSTRIES ALLIANCE

Safety Training Program

When you are faced with an issue related to environmental, health and safety, call [Printing Industries Alliance \(PIA\)](#). PIA has offered EHS services to its' membership for over 20 years and, in conjunction with Printing Industries of America, provides a tremendous amount of expertise in assisting members. OSHA mandates employee training to be in compliance with many of their standards. Other training, while not mandated, just makes good business sense.

A major portion of the services offered involve safety training. Participation in this no-cost training can help your employees work safer, reduce your exposure to Workers' Compensation losses and help keep you out of trouble with OSHA, NYS DEC and other regulatory agencies. Training topics, available FREE to members, include:

■ **OSHA 10 Hour General Industry Outreach for Printing Companies:** This program covers a variety of different topics including Introduction to OSHA, Walking and Working Surfaces, Fire Protection, Electrical, Flammable/Combustible Liquids, Machine Guarding, Material Handling and more. This program is available to be held at your facility at no charge and is also scheduled during the year in various cities in our territory.

■ **Ergonomics Training:** Ergonomics is not an OSHA standard so you can't get cited, right? Wrong! An OSHA inspector witnessing an unsafe work practice can still cite your company even when an OSHA standard does not cover the work practice. Ergonomics contribute greatly to lost work time, and can have a very significant impact on the bottom line.

■ **Lift Truck Safety Training and Certification:** Lift truck accidents are almost always serious. OSHA mandates that all personnel operating lift trucks receive safety training and certification of their safe operating ability. Failure to do so can result in a significant fine for each untrained operator. PIA staff will conduct a comprehensive safety training program, followed

by a hands-on road test. Trainees who satisfy the training and road test requirements will receive National Safety Council certification.

■ **Hazardous Waste Management Training:** For many companies, depending on the volume of hazardous waste generated, employees who manage and/or handle hazardous waste are subject to mandatory annual training. PIA staff will conduct this training, on site, at your request.

■ **OSHA Mandated Training:** Training on OSHA mandated topics is available to be conducted at no charge, on any shift, at your facility. We can also custom prepare a training session for you if your company has a special need. Topics include:

- Hazard Communication
- Lockout/Tagout
- Emergency Action Plan/Fire Extinguisher
- Personal Protective Equipment

Other Topics include:

- Safe Lifting Techniques
- Workplace Violence Protection
- ... and more

WEBINAR TRAINING: PIA Safety Training is also available via webinar. OSHA compliance training can be performed for Emergency Evacuation/Fire Protection, Hazard Communication and Lockout/Tagout to your employees at your facility and broadcast it live from our Amherst office when it best fits your schedule. **Benefits are many.** Far less costly to the association, but a far bigger advantage to the member. You need not bring large groups off the floor at any one time for long periods of time. **Training can be scheduled when it fits well for the member.** Emergency Evacuation is also available in a recorded **Spanish webinar** presentation.

COST: There will be no charge for training conducted for PIA Member companies.

BEYOND TRAINING: Printing Industries Alliance provides consultation on safety-related topics with members on a regular basis. In PIA's territory, Jerry Banks, PIA Manager of Membership Services, conducts all training and is available for consultation as well. Reach Jerry at (800) 777-4742 or jerry@PIAlliance.org. Gary Jones, Assistant VP, EHS Affairs, Printing Industries of America, is also ready and qualified to respond to any environmental/safety question you might have. Call Gary (gjones@printing.org) at (800) 910-4283.

DON'T TAKE OUR WORD FOR IT . . . Read on for comments from PIA members.

*Acting as the Safety Director for our company, as I am sure is the case for many others in my position, is an added responsibility to my regular duties. The safety-training program that the PIA offers to its members has been of great assistance to me. **It has substantially reduced the number of hours of my time it takes to keep us in compliance with OSHA's many regulations.** Most importantly to our company and I'm sure many others in these hard economic times, is the fact that safety training classes are conducted at no cost to the PIA membership. **This service helps us keep our operating cost down and keep us competitive in the market place.** I have to include that your recently OSHA approved webinar training method has proven to be a plus for us as well. I know it shortens the availability time between my needing a training done and when you are available to do it. All of the employees that I have spoken to here about using the webinar have given a favorable response to them. You personally have created a comfort level in doing the webinars where all attending seem to feel at ease to speak right up and ask questions over the speaker phone. **HANK THAUER, SAFETY DIRECTOR, METRO GROUP INC., CHEEKTOWAGA, NY***

As you know, Jerry Banks conducted triennial Powered Industrial Truck Training at Graphic Controls the week of May 23rd. . . We handed off our complex schedule which covered all three shifts (212 employees), and our 24/7 teams, and Jerry ran with it. If this was an evaluation of Jerry's abilities, he would have passed with

*flying colors. On 5/24, his first lecture started at 4:30 a.m. On 5/25, his last lecture ended at 9:30 p.m. I think he was probably burning the candle at both ends that week. Many thanks to Jerry Banks and to the PIA. We couldn't have completed this training so smoothly without the flexibility, experience and safety knowledge demonstrated by everyone involved. He coordinated his efforts well with the members of our leadership team, sticking to the schedule and making it all work! **CHRISTOPHER TALLEY, TRAINING & DEVELOPMENT / SAFETY MANAGER, GRAPHIC CONTROLS, BUFFALO, NY***

*"[Jerry Banks] willingness to do the classes in a manner that best suited our plant was a great benefit to our managers. I have heard nothing but praise from the class participants . . . He is truly an asset to the PIA and the printing community in general." **CANDY FUNK, SAFETY COORDINATOR, QUAD GRAPHICS, SARATOGA SPRINGS, NY***

*"I just wanted to say thanks and let you know that Jerry Banks did an excellent job with the Safety Training and Forklift Training last week at our Plant . . . It is nice to know that we can get this type of training and it was a big help to us. Again, thank you." **DAVID BEARDSLEY, DIRECTOR OF MANUFACTURING AND SAFETY, ALLEN-BAILEY TAG & LABEL, CALEDONIA, NY***

**PRINTING INDUSTRIES ALLIANCE
SAFETY TRAINING REPLY FORM**

Dates of training may be coordinated with other members in your area to maximize training efficiency. Training will be allocated on a "first come, first served" basis. **Questions?** Contact Jerry Banks at PIA at (800) 777-4742. Please contact me to discuss my training needs, provided as a service of membership in Printing Industries Alliance.
